

BIOGRAPHY

of

James J. Markowsky

*Executive Vice president — Power Generation
American Electric power Service Corporation*

Dr. Markowsky began his career with AEP in 1971 as a Senior Engineer in AEP's Mechanical Division. In 1977, he was named Program Manager for AEP's pressurized fluidized bed combustion development program. He was named head of the Mechanical Engineering Division and elected Assistant Vice President in 1984; Vice President — Mechanical Engineering in 1987; Senior Vice President and Chief Engineer in 1988; Executive Vice President — Engineering and Construction in 1993; and Executive Vice president — Power Generation in 1996.

The Power Generation Group includes four major organizations: Fossil and Hydro Production, Fuel Supply and Business Support, Power Generation Engineering, and Environmental Services. In his present position, Dr. Markowsky is responsible for the fossil and hydro generating facilities, affiliate coal mining, coal procurement and transportation, and environmental services.

Dr. Markowsky holds a bachelor's degree in Mechanical Engineering from Pratt Institute, master's degrees from Cornell University and the Massachusetts Institute of Technology, and a doctorate from Cornell. He is a licensed professional engineer in Indiana, Kentucky, Michigan, New York, Ohio, Tennessee, Virginia, and West Virginia,

Dr. Markowsky served as an Adjunct Associate Professor at City College of New York during 1975-1977 and is the author of a number of publications on power generation. He is a member of the Association of Edison Illumination Companies Power Generation Committee, the American Society of Mechanical Engineers Industry Advisory Board, Chairman of the Coal Utilization Research Council, member of the EPRI Research Advisory Committee, and Chairman of the EPRI Fossil Power Plants Business Unit Council Steering Committee.
